

Mehboob Ali

Senior Full-Stack Engineer · Ruby on Rails, React, TypeScript

Lahore, Pakistan (open to remote) | imehboobali@outlook.com
mehboob.dev | linkedin.com/in/mehboobali98 | github.com/mehboobali98

SUMMARY

Senior full-stack engineer (backend-first) with 5+ years on EZO's IT asset management SaaS: Rails/MySQL services and integrations, plus React/TypeScript UIs such as a solo-built rack-layout editor. Promoted three times; led teams of up to 8.

TECHNICAL SKILLS

Backend: Ruby, Ruby on Rails, ActiveRecord, MySQL, REST APIs, background jobs (delayed_job), multi-tenant SaaS
Frontend: React 18, TypeScript, Redux Toolkit, React Router, React Flow, MUI, styled-components, ERB, jQuery
Testing & Quality: RSpec, Minitest, frontend unit tests, CI (GitHub Actions, git hooks), Brakeman, Bullet
Infrastructure & Tools: AWS (S3, SNS, SQS, Marketplace), Docker, Datadog, Airbrake, Claude Code, Cursor

EXPERIENCE

7Vals (EZO)

Lahore, Pakistan

AssetSonar and EZOfficeInventory: IT asset management SaaS

Aug 2021 – Present

Principal Software Engineer

Jul 2026 – Present

- Run the Workflow Automation program across its Rails backend and React Flow canvas: architecture, code review and mentoring, while writing production code
- Sole author of the Server Rack Visualization frontend: React Flow layout canvas, device faceplates, drag-in palette
- Introduced the team's Cursor rules, Claude Code skills and git-hook CI guardrails

Senior Software Engineer

Jul 2024 – Jul 2026

- Led about 8 engineers replacing a one-step rules engine with a node-based workflow engine, and wrote parts of its React/TypeScript canvas: workflow data model, edge connections, Redux state
- Led a 5-engineer team from architecture to production in about 7 months on a CMDB / IT relationship graph; built parts of its React Flow view, with unit tests for edge building
- Took Software Asset Management from usage-metering infrastructure to customer-facing React screens (utilization, Shadow IT detection, KPI widgets); 3 of its 4 phases shipped as flagship releases
- Delivered procurement integrations, including CDW (a flagship release with sales demos and training), and led a 2-engineer AWS cloud integration from design to release

Software Engineer (L2)

Jan 2023 – Jul 2024

- Built the Service Catalog (ITSM) from scratch, including a vanilla-JavaScript library embedded in customers' Zendesk Help Centers: catalog, search, request forms, English/French; Rollup builds hosted on S3
- Helped the PM refine the Peripheral Device Discovery spec, then built and launched it as a flagship release
- Built the AWS Marketplace SaaS sign-up: SNS subscription events plus the Entitlement and Metering APIs

Software Engineer

Aug 2021 – Jan 2023

- Cut a device sync over millions of software records from 12–15 hours to under 1 hour (Datadog profiling, N+1 removal, batching); the pattern was reused in later MDM integrations
- Built the audit-trail engine from scratch, closing a customer request open since 2019
- Built Custom Report Engine screens in Rails views, jQuery and CSS; fixed SQL-injection findings with Brakeman

OPEN SOURCE

rmine | *Go*: Redmine CLI built for developers and coding agents; 12 tagged releases, embedded Claude Code skill
mehboob.dev | *Astro, TypeScript*: portfolio with zero client JavaScript, Lighthouse 100 accessibility
bitwise_attributes | *Ruby*: gem packing boolean flags into one ActiveRecord column; CI across Rails 6.1–7.2

AWARDS

7Vals: Model Software Engineer 2026, Precision Engineer 2024, Beautiful Code Writer 2023 & 2025, Rising Star 2022

EDUCATION

National University of Computer and Emerging Sciences (FAST-NUCES)

Lahore, Pakistan

BS Computer Science; 4.0 SGPA in final two semesters; Gold Medal, Rector's and Dean's Lists

2017 – 2021
