

Mehboob Ali

Senior Full-Stack Engineer · Ruby on Rails, React, TypeScript

Lahore, Pakistan (open to remote) | imehboobali@outlook.com
mehboob.dev | linkedin.com/in/mehboobali98 | github.com/mehboobali98

SUMMARY

Full-stack engineer, backend first, with 5+ years on EZO's IT asset management SaaS: Rails and MySQL underneath, React and TypeScript on top. I built our rack-layout editor on my own and the catalog that runs inside customers' Zendesk Help Centers. Promoted three times.

TECHNICAL SKILLS

Backend: Ruby, Ruby on Rails, ActiveRecord, MySQL, REST APIs, background jobs (`delayed_job`), multi-tenant SaaS
Frontend: React 18, TypeScript, Redux Toolkit, React Router, React Flow, MUI, styled-components, ERB, jQuery
Testing & Quality: RSpec, Minitest, frontend unit tests, CI (GitHub Actions, git hooks), Brakeman, Bullet
Infrastructure & Tools: AWS (S3, SNS, SQS), Docker, Elasticsearch, Datadog, Airbrake, Claude Code, Cursor

EXPERIENCE

7Vals (EZO)

Lahore, Pakistan

AssetSonar and EZOfficeInventory: IT asset management SaaS

Aug 2021 – Present

Principal Software Engineer

Jul 2026 – Present

- Run the Workflow Automation program, mentor junior engineers and join customer calls on tricky issues
- Have reviewed pull requests from 40+ engineers since 2022, and interview candidates most months
- Wrote the whole Server Rack Visualization frontend: a React Flow canvas where devices drag in from a palette and render as faceplates
- Built IT Asset Accuracy from the Rails endpoints to the React screens, with Elasticsearch search
- Set up the team's Cursor rules, Claude Code skills and git-hook CI checks

Senior Software Engineer

Jul 2024 – Jul 2026

- Led about 8 engineers replacing a one-step rules engine with a node-based workflow engine. I wrote its HTTP node, webhook triggers and branching, and the React screens for some of its nodes
- Led 5 engineers taking a CMDB relationship graph to production in about 7 months. I wrote its design RFCs, built the backend and worked on the React Flow graph view
- Built the Software Asset Management dashboards in React, including Shadow IT utilization and usage KPIs
- Delivered the CDW procurement integration and led a 2-engineer AWS cloud integration

Software Engineer (L2)

Jan 2023 – Jul 2024

- Built the Service Catalog, including a plain JavaScript library that runs inside customers' Zendesk Help Centers, in English and French, bundled with Rollup and served from S3
- Wrote the Device Uniqueness Engine so devices with invalid BIOS serials no longer create duplicate assets
- Helped the PM tighten the Peripheral Device Discovery spec, then built and launched it
- Built the AWS Marketplace sign-up on SNS events and the Entitlement and Metering APIs

Software Engineer

Aug 2021 – Jan 2023

- Cut a device sync over millions of software records from 12–15 hours to under an hour with Datadog profiling, N+1 fixes and batching. Later MDM integrations reused the approach
- Wrote the audit-trail engine, closing a customer request that had been open since 2019
- Built report screens in Rails views, jQuery and CSS, and fixed SQL injection issues that Brakeman flagged

OPEN SOURCE

rmine | *Go*: Redmine CLI for developers and coding agents, with 12 releases and a bundled Claude Code skill
mehboob.dev | *Astro, TypeScript*: my portfolio, with no client JavaScript and 100 on Lighthouse accessibility
bitwise_attributes | *Ruby*: gem that packs boolean flags into one integer column, tested on Rails 6.1 to 7.2

EDUCATION AND AWARDS

National University of Computer and Emerging Sciences (FAST-NUCES)

Lahore, Pakistan

BS Computer Science; 4.0 SGPA in final two semesters; Gold Medal, Rector's and Dean's Lists

2017 – 2021

7Vals: Model Software Engineer 2026, Precision Engineer 2024, Beautiful Code Writer 2023 & 2025, Rising Star 2022
